

Softening Series – RevV2 ***Water Softener System***

“The softer side of life”

Family, home and finances are three important aspects of your life. Take care of all three with an **elements RevV2 water softening system**; an economical way to provide your family and home with soft water. Hard water has negative effects on your skin, hair, laundry, dishes, cleaning, as well as your plumbing and appliances. Effectively remove hard water and see immediate benefits. Give your family and home quality water.

Benefits of Soft Water

- No soap scum build-up on your body and hair, leaving your skin softer and your hair shinier.
- No hard water spots and build-up on glasses, dishes, sinks, and fixtures.
- Spend less time and elbow grease cleaning.
- Brighter, whiter, softer and longer lasting clothes without mineral build-up on fibers.
- Save 80% on soaps and detergents in the kitchen, laundry and bathroom. Cleaning products do their job more effectively with soft water.
- Cost savings – without scale build-up your plumbing and appliances will last longer; reducing the number of times you will purchase appliances in your lifetime.
- Energy savings on your heating bill of roughly 20% with water heaters and appliances that can function properly without scale build-up.

Softening Series – RevV2 Water Softener System

The *elements softening series RevV2* water softeners efficiently produce soft water throughout your home. This economical system uses patented, hermetically sealed, corrosion and abrasion resistant ceramic discs for reliable operation. These discs are guaranteed to last a lifetime
