

Softening Series – RevV3 ***Water Softener System***

“Providing you the softer side of life”

With your family and home as your two most valuable assets, you want to provide the best care you can for them both. Having hard water has negative effects on both your family and home. Effectively remove hard water and see immediate benefits. Provide them with soft water with an **elements RevV3 water softening system**. Give your family and home quality water.

Benefits of Soft Water for Your Family

- Soft and healthy skin and hair.
- Less time cleaning fixtures without soap scum build-up.
- Laundry is brighter, whiter and softer and lasts longer.
- Up to 80% savings on soaps and detergents in the kitchen, laundry and bathroom.
- Up to 20% energy savings on your heating bill; water heaters and appliances function more efficiently without scale build-up.

Benefits of Soft Water for Your Home

- No hard water build-up on appliances and household fixtures.
- No hard water build-up in your plumbing, saving you money over a lifetime because they last longer.

Softening Series – RevV3 Water Softener System

The *elements softening series RevV3* water softeners effectively and efficiently produce soft water throughout your home. This system uses patented, hermitically sealed, corrosion and abrasion resistant ceramic discs for reliable operation instead of a piston design. These discs are backed by a lifetime warranty unlike piston design valves.

- Valve with ceramic disc design.
- Programmable for upflow or downflow regeneration.
- Reversed inlet/outlet ports.
- Variable programming for operational efficiency.
- 72 hour memory recall after power outage.
- 12 Volt power supply for energy savings.
- High quality cross-link resin for maximum capacity.
- Extremely quiet operation.
- Easy to read LCD digital display screen.

The *elements softening series* are available in various configurations and capabilities. Our highly qualified Hanksraft *elements* dealers will be happy to recommend the correct system that fits your needs.

We are committed to providing you with the best solution to your water quality problems. Contact us today to get the quality water you and your family deserve.
