

Innovative Solutions for Your Water

RevV4 System - Softening Series

Your home is the cornerstone of your life. It's where memories are made and you want to care for it to keep your family comfortable, healthy, and happy throughout the years.

Soft water can significantly improve the quality of life in your home. You'll spend less time cleaning water spots off of your dishes and counter tops, your clothes will last longer, stay brighter and whiter, and you will save money due to increased efficiency and extended life of home appliances.

Elements RevV4 water softeners can save up to 80% on soaps and detergents that are typically wasted when used with hard water. These systems use patented, diamond-hard ceramic discs that are corrosion and abrasion resistant, eliminating the need for short-lived rubber gaskets.

RevV4 water softeners from Elements by HanksCraft are incredibly energy efficient. They carry a lifetime warranty and will provide many years of reliable service.

Benefits of Soft Water:

- No hard water build-up on appliances and household fixtures
- Laundry is brighter, softer, and lasts longer
- Up to 80% savings on soaps and detergents in the kitchen, laundry and bathroom
- Up to 20% energy savings - water heaters and appliances function more efficiently

RevV4 System Softening Series

Product Specifications

System	Resin (cu ft)	Overall Height (In.)	Diameter (In.)	Flow Rate
9x48	1.0	54.3"	9"	16 gpm
10x44	1.3	50.3"	10"	17 gpm
10x54	1.5	60.3"	10"	18 gpm
12x52	2.0	58.3"	12"	20 gpm
13x54*	2.5	60.3"	13"	21 gpm

*This system is not IAPMO certified.

Electrical / Operational Specifications

Valve		Working Conditions	
Valve Model	RevV4	Operational Pressure	22 psi - 87 psi
Transformer Input	100-240VAC / 50-60Hz	Operational Water Temp.	41° F - 113° F
Transformer Output	12VDC / 2A	Inlet Water Turbidity	< 5NTU

- Innovative ceramic disc design that is corrosion and abrasion resistant
- High flow rates to handle any residential or light commercial application
- Advanced programming options with 7 fully adjustable cycles for maximum system efficiency
- Intelligent metering with up-flow regeneration lowers salt usage
- 72-hour memory backup provides peace of mind in the event of a power outage
- High-quality, cross-link resin
- LCD digital display
